KingCoin Executive Summary

Project Name: Kingdom of Cryptonia
Token Symbol: KGC
Launch: Q2 2025 via IDO (ChainGPT or similar)
Website: www.cryptonia.org

The Problem

The current digital experience economy lacks:

- Meaningful participatory governance

- Fair value exchange in narrative-based ecosystems

- Tools to merge storytelling, decentralized ownership, and real-world interaction

- A structured legal and symbolic framework for gamified societies

---

Our Solution: KingCoin & Cryptonia

KingCoin (KGC) is the utility token that powers the **Kingdom of Cryptonia**:
A **decentralized narrative micronation** where citizens shape laws, create guilds, earn noble titles, and participate in a hybrid digital/physical ecosystem.

Key Features

- DAO-based governance and decision-making

- NFT-Licenses for titles, events, and fiefdoms

- Real-world hub: Borgo di Sempronio (Tuscany, Italy)

- Metaverse-ready narrative platform with user-generated content

- Fully MiCAR-compliant and legally structured

Token Utility

The $KGC token is used for:

- Purchasing noble titles, licenses, and roles

- Voting in the Kingdom's DAO

- Accessing quests, events, and exclusive assets

- Staking for influence and narrative rights

- Funding proposals and guilds via DAO treasury

Roadmap Highlights

- **Q2 2025**: IDO & Token Distribution

- **Q3 2025**: DAO Launch + First Chronicles Vote

- **Q4 2025**: Open Book, Civic Portal & Quests

- **2026+**: Cryptonia Metaverse, Exchange Listings, On-chain Reputation

---

Tokenomics Overview

- **Total Supply**: 1,000,000 KGC

- **Public Sale**: 500,000 KGC (50%)

- **Token Price**: €2.00

- **Soft Cap**: €400,000

- **Fundraising Goal (Hard Cap)**: Based on full issuance cap (1,000,000 KGC)

Allocation & Vesting
